Salary Schedules of Professional Personnel
Maryland Public Schools
1985-86

Office of Management Information Systems
Maryland State Department of Education
200 West Baltimore Street
Baltimore, MD 21201

OMIS-04100(R) 250 10/85

INTRODUCTION

The following salary information was prepared from the actual salary schedules submitted to the Maryland State Department of Education by the 24 local education agencies (LEA's).

Part I contains actual salary schedules for new teachers with (1) a Bachelor's Degree and a Standard Professional Certificate or (2) a Master's Degree and an Advanced Professional Certificate. Any compensation available only for personnel employed prior to specified dates has been ignored. Therefore, transitional salary schedules, schedules for previously employed personnel, extra duty pay, etc., are not included.

Part II contains maximum salaries attainable within the LEA for the positions shown. The salaries for Superintendent and Deputy Superintendent are not only the maximum for the year but are also the actual for 1985–86.

Part III shows the range available for Directors, Instructional Supervisors, Principals and Vice Principals. No attempt is made to describe any requirements for reaching the maximum salary within any of the classifications. However, within each position there may be multi–salary scales based on the level of responsibility. For example, a principal's salary may be based on size of school or school level. So, while it may be possible to receive $45,000 as a high school principal in a school with enrollment greater than 1,500, an elementary principal in a school of 250 students in the same LEA may reach the maximum at $40,000.

Additional information may be obtained by contacting any of the 24 LEA personnel offices.

13	Local Appropriations for Public Schools as a Percent of Assessed Valuation, Net Taxable Income and Total Wealth: Maryland Public Schools: 1984-85

INTRODUCTION

Selected Financial Data is prepared annually from information reported by each of the 24 Maryland local education agencies (LEAs) in the Annual Financial Reports. These reports, authorized under the Public Schools Laws of Maryland, Section 2-205, Section 5-109 and Bylaw 13A.02.01.03, dictate a uniform format for reporting LEA finances to the Maryland State Department of Education. A manual entitled the Financial Reporting Manual for Maryland Public Schools was developed to further define the reporting requirements as contained within the law and to enable a collection of financial data which will conform to both federal and state reporting requirements.

FINANCIAL REPORTING IN BRIEF

LEAs are legal entities which exist to operate schools or contract for educational services. In Maryland, these school units are coterminous with the boundary of the political subdivision; i.e., the 23 county governments and the Baltimore City government. These school systems have no taxing powers and must compete with other county or city agencies for funds to provide educational services. Local funds for education are made as appropriations for specific purposes; and to assure that these purposes are adhered to, separate funds must be maintained to account for the monies. Maryland LEA's maintain a minimum of 6 funds in addition to a special account for keeping track of fixed asset.

Revenues for each fund are provided from federal, state and local sources. It is important to note that federal revenue is recognized as it is spent or encumbered not as it is received; and, therefore, is not equal to the appropriation. Following are a list of the funds and a brief description of each:

(1) The Current Expense Fund contains all accounts for general, routine current operations. Maryland presently has 12 categories into which current expenses are reported - Administration, Instruction, Student Personnel Services, Health Services, Student Transportation, Operation of Plant, Maintenance of Plant, Fixed Charges, Food Services, Community Services, Special Education Capital Outlay. Some of these categories are further divided into specific functions, but each of the categories require some or all of the following object of expenditure details: salaries and wages, contracted services, supplies and materials, other charges, replacement and additional equipment, and outgoing transfers. Subobject details are required for specific accounts; and expenditures for the categories of Instruction, Special Education and Administration require details to isolate expenditures for particular services, e.g. business support services versus centralized support services, regular instruction versus expenditures for gifted and talented students, and itinerant special education services versus expenditures for resource rooms. In addition, expenditures for instruction and special education and for school instructional support services in Administration are reported by school level.

The Current Expense Fund is separated into two parts. The first part consist of all expenditures from sources of money which are unrestricted for use, such as local appropriations and most state aid. The second part, consisting of expenditures which are restricted ror use, requires separate expenditure reporting to account for how expenditures were made for each grant and to assure that money was spent in accordance with the categories/ objects defined in the Financial Reporting Manual. These expenditures are combined with unrestricted expenditures to produce a consolidated report of all current expenditures. Additional information about federal fund expenditures can be tound in a release entitled Federal Program Expenditures Report, annually published by the Maryland State Department of Education.

(2) All transactions relating to major school construction or remodeling are accounted for in the School Construction Fund as follows: purchase of sites, site improvements, building additions, remodeling, additional equipment, and other construction expenditures. In Maryland, the State has the responsibility of funding school construction and local school systems may supplement these funds to provide facilities in excess of those which are state approved.

(3) The Debt Service Fund accounts for the systematic repayment of principal and interest on debt. Although Maryland LEA's do not have the authority to issue bonds for school construction, they may be responsible for handling repayment of debt.

(4) The Food Service Fund accounts for operations required to provide meals to students and staff in schools; i.e., operating kitchen equipment, preparing and serving food, cleaning and storing equipment, and delivery services.

(5) The Student Activities Fund accounts for funds which are owned, operated, and managed by the student body under the guidance of the LEA staff, e.g., extracurricular activities, school stores, etc.

(6) The Trust/Agency Fund accounts for assets for which the LEA is trustee or agent.

HISTORICAL CONTINUITY

Due to Maryland General Assembly decisions, federal legislation and accounting policy changes initiated by the AICPA and NCGA which impact annually upon the reporting requirements for the school systems, historical continuity in reporting becomes difficult. One such change became effective for the 1983 fiscal year when salaries and wages for supervisors of Instruction and all those employed in services which enhance instructional programs for regular pupils were pulled from the category of Instruction and moved to the category of Administration. Because the impact of such a reporting change is so startling, those expenditures have been separately indentified in Selected Financial Data, Part II, Table 5.

Expenditures for educating students with special needs were separated from expenditures for educating regular students in 1981 when Category 13, Special Education, was added. Therefore, when comparisons of expenditures for Instruction are made for years prior to 1981, it will be necessary to add Special Education expenditures to instructional expenditures. For the years after 1983, not only must Special Education be added, but the expenditures now reported in Administration for School Instructional Support also must be added.

Other minor reporting changes have occurred over the past several years. Briefly, two categories were eliminated and expenditures transferred to other areas, and one category was abbreviated. Expenditures for Student Body Activities are now Cocurricular Activities under Instruction, and Outgoing Transfers is an object of expenditures to be reported in the appropriate category rather than a separate category. The category of Food Services, under which expenditures of local dollars for Food Service Supervisor and his/her staff are budgeted, now has only one object of expenditure-interfund transfers. All Food Service expenditures are reported in detail in the Food Service Fund and shown in Selected Financial Data, Part II, on Table 11.

It should be noted that many of the financial details which the LEA's report are not regularly included as a part of our annual public information releases. If you have specific needs for information not contained with Selected Financial Data, we would like to hear from you to determine if we can provide the specific information you desire. Questions regarding this information, may be addressed to Kathie Hiatt at 659-2664.

DEFINITIONS

Administration refers to an expenditure category for reporting the general regulation, direction, and control of LEA and the LEA instructional programs. Activities in this category affect the LEA as a whole, not the administation of a single building or narrow phase of school activities and generally refer to LEA activities involving the formulation and execution of educational or financial policy.

Assessed Property Valuation is the valuation of property as determined by the State Department of Assessments and Taxation.

Average Daily Attendance is computed by dividing the sum of the days present of all students in the school system by the total number of days that schools are in session in given a school year. When cost per pupil data are based on ADA, kindergarten students who attend for only one-half day are counted as one-half student. ADA so adjusted is referred to as equated ADA.

Average Number Belonging is computed by dividing the sum of the days present and absent of all pupils in the school system by the total number of days that the schools were in session. When cost per pupil data are based on ANB, kindergarten pupils are counted one-half when they attend school for only one half-day.

Bonded Debt is the part of the local unit debt which is covered by outstanding bonds.

Capital Outlay is an expenditure which results in the acquisition of a fixed asset or an additon to fixed assets.

Community Services are services other than those for public schools and adult education which are provided by the school or local unit for the community as a whole or some segment of the community; e.g., community recreation programs, civic activities, public libraries, programs of custody and care of children, etc.

Debt Service refers to expenditures for the debt principal and interest, excluding principal and interest on current loans. Obligations incurred by the State of Maryland for construction of public schools are excluded.

Federal Funds are funds received from the federal government either directly or indirectly (as is the case with most monies which are given to the Maryland State Department of Education and distributed to the LEAs by any of several methods.)

Fixed Assets are land, buildings, machinery, furniture, and other equipment which the local unit intends to hold for an extended period.

Food Services are activities involved with the preparation and serving of regular and incidental meals, lunches, or snacks for school activities, and the delivery of food.

Fund is an independent accounting entity with its own assets, liabilities and fund balances, and generally established as an account for financing specific activities of an agency's operations.

Health Services are physical and mental health activities which provide pupils with appropriate medical, dental, and nurse services.

Instruction refers to activities dealing directly with the teaching of regular pupils either in the school classrooms or in any other location, or it involves other learning situations such as cocurricular activities. Included are expenditures for the Office of the Principal.

Local Appropriation is money received out of funds set aside by the County Commissioners or County/City Council for a special purpose such as education.

Local Education Agency (LEA) is the basic administrative unit which exists primarily to operate schools. In Maryland, the LEAs coincide with the political subdivisions i.e., the 23 counties and Baltimore City.

Maintenance of Plant refers to activities concerned with keeping the grounds, buildings and equipment in the original condition of efficiency or or completeness either through repairs or replacement of property. Since expenditures for replacement equipment are a subobject within each category of expenditure, all replacement equipment has been removed from each category and reported within this category in Selected Financial Data.

Operation of Plant consists of keeping the physical plant open and ready for use, including cleaning, disinfecting, heating, moving furniture, caring for grounds, operating telephone switchboards, and other activities which are repeated regularly.

Revenue means an addition to an asset which does not increase any liability, does not represent the recovery of an expenditure, does not represent the cancellation or decrease in assets, and does not represent contribution of fund capital in Food Service and Student Body Activity funds.

Special Education consists of activities designed for students who, through appropriate assessment, have been determined to have temporary or long-time special education needs arising from cognitive, emotional, and/or physical factors.

Students Personnel Services consists of attendance services, social work services or student account service which are designed to improve the student's attendance at school and prevent or solve student problems at home, the school, or in the community.

Student Transportation involves the coveyance of pupils to and from school activities as provided by State law, including trips between home and school or trips to school activities.
